

1.4 Due to the time that has elapsed since this cartridge was manufactured, a search of records to ascertain who were the customers for this device will take some time.

2. The original 40mm x 46 Sound & Flash cartridge was developed for Law Enforcement agencies to be used as a distraction device in stand off type situations when there was a need to project a distraction effect. The popularity of this type of cartridge has since led to further developments and modifications.

3. Enclosed please find a copy of the original basic technical data for this cartridge together with a basic drawing. Basically, the function of the cartridge was that the propelling charge would ignite a centrally located delay column which in turn would initiate the report charge. The delay was approx. 1.3 seconds which would give a distance to the initiation of the report charge of approx. 100 metres.

4. Your e-Mail included a photograph, the last one of those included, of a projectile lying in water. We have not been able to identify this projectile from the photograph provided.

5. Please do not hesitate to contact me if I can be of any further assistance.

Yours faithfully
NICO PYROTECHNIK

A handwritten signature in black ink, appearing to read "Peter J. McAuley", with a long horizontal line extending to the right.
